

Level up your cybersecurity and leadership skills.

Drive digital transformation and advance your career. Prepare to become a leader in data security and business management with Rivier's MBA in Cybersecurity Leadership.

Rivier's MBA in Cybersecurity Leadership is a comprehensive program that combines traditional business education with elements from the fields of computer science, cybersecurity, and psychology. The program is designed to prepare graduates to lead and manage cybersecurity initiatives within modern organizations while addressing the evolving challenges in the digital landscape.

Choose Rivier

Rivier's MBA programs provide strong foundational knowledge and hands-on learning that build on your existing skill sets and confidence in business management. On-campus or online course options provide greater flexibility to working students, and six seven-week terms annually offer a swift path to earning your degree. Additionally, Rivier's curriculum utilizes the most current open education resources in place of textbooks, significantly reducing the cost of your program.

Save with Open Educational Resources

Most instructors in the online MBA in Management program use Open Educational Resources (OER) in place of traditional textbooks. This means digital, openly licensed content is available free of charge to students. Featuring multimedia, interactive, and engaging course content, OER materials can save you an estimated \$1,500 over the length of your program.
