## Staff Pick of the Month

Peter Guevin, Circulation/Technical Services Assistant

*1984* by George Orwell is a timeless dystopian novel that explores themes of totalitarianism, surveillance, and the manipulation of truth. The story follows Winston Smith, a man living under the oppressive regime of Big Brother, where every aspect of life is controlled and monitored. Orwell intended his novel as a warning. Some see similarities to today. Surveillance: Just as in Orwell's world, modern society grapples with pervasive surveillance through technology, from CCTV cameras to data tracking by corporations and governments. Misinformation: The concept of "doublethink" and the manipulation of truth in the novel mirrors today's concerns about the spread of misinformation. Written seventy-five years ago, Orwell's *1984* remains a powerful warning about the dangers of unchecked power and the importance of safeguarding our freedoms and truth.

### What's your favorite book?

One of two, depending on the day: *A River Runs Through It* by Norman Maclean or *Daniel Deronda* by George Eliot. They differ from each other greatly. The former: a trim novel about fly fishing, family, religion. The latter: a very long novel (which by Eliot isn't?) about the patriarchy, family, the British class system, Judaism and, finally, the birth of Zionism.

### What's your favorite movie?

*A River Runs Through It*. I think it is a beautiful adaptation of a beautiful novel. Bonus: Young and handsome Brad Pitt, the lead, resonates with young and handsome Robert Redford who, not coincidentally, directed the film.

### What's your Hogwarts house?

I would like to think Gryffindor, but probably the hat would put me in Hufflepuff.

### If you could only have three apps on your phone, which would you pick?

Apple Podcasts. The Official Spurs app for Tottenham Hotspur FC. Apple News.
